

#1 250g Reels

152mm
41mm
△120g Empty

#1 reels can withstand temperatures

up to 120°C

EMPTY REEL WEIGHTS

Weight of filament is additional to empty weight of reel.

To estimate the remaining filament on a reel, simply weight your product and subtract the empty weight of the reel shown below!

#2 500g Reels

198mm
37mm

100mm
△1000g Empty

#8-#9 reels can withstand temperatures

up to 110°C

*Empty reel images not to scale

**Weights and dimensions are close estimates. However, the exact numbers may vary slightly.

***Plastics vary in density. For examples, 750g of OBC is wound on a #4 reel, typically used for 1kg spools of filament. The best way to know which reel you have is to measure for yourself, or contact us!

#10 10kg XL Reels

450mm
187mm
△1720g Empty

XL

#10 XL reels can withstand temperatures

up to 60°C

WARNING!

Filament on each reel may not be able to achieve the same temperature as the reel itself. Please review temp and drying instructions for more info on your product first.
